

EXPERIENCE WINDOWS 7

# RDX7 AS THE BEST FIRST STEP TOWARDS WINDOWS 7

**Getronics**  
a KPN company

DISCOVER THE MANY ADVANTAGES OF WINDOWS 7 AND FIND OUT WHAT IT'S LIKE TO WORK WITH THE LATEST VERSION OF MICROSOFT WINDOWS. WITH RAPID DEPLOYMENT EXPERIENCE 7 (RDX7), GETRONICS OFFERS YOU THE CHANCE TO EXPERIENCE WINDOWS 7 AND RELATED NEW WORKSTATION TECHNOLOGIES QUICKLY AND WITHOUT ANY RISK. WITHOUT HAVING TO CHANGE YOUR EXISTING INFRASTRUCTURE.

#### The economic downturn and innovation

The economic recession has put companies' ICT budgets under pressure. Saving money is the central theme and capital expenditure is postponed or even halted. There's little room for innovation or new technologies, whilst innovation should be top priority to keep up with the IT market developments and benefit from efficiency savings.

#### New workstation technology

Windows 7 brings new workstation capabilities and technologies to the market, with many benefits to be reaped. These benefits should be explored and maximized to enable the value of this technology change, such as improved security, cost-saving, enhanced end-user productivity, simplified management and energy-savings. The Getronics Business Value Case Study confirms the advantages and reveals that in ICT-related costs Windows 7 saves 77 euros per PC per year.

#### The market is ready for Windows 7

According to Forrester, more than 40% of companies are planning to roll out Windows 7 before the end of 2010. Many have already launched impact analyses, adoption programs and planning for a Windows 7 rollout. Companies cannot risk falling behind the market.

#### MIGRATING TO NEW TECHNOLOGIES IS PART OF OUR CORE BUSINESS

#### Are you ready for Windows 7?

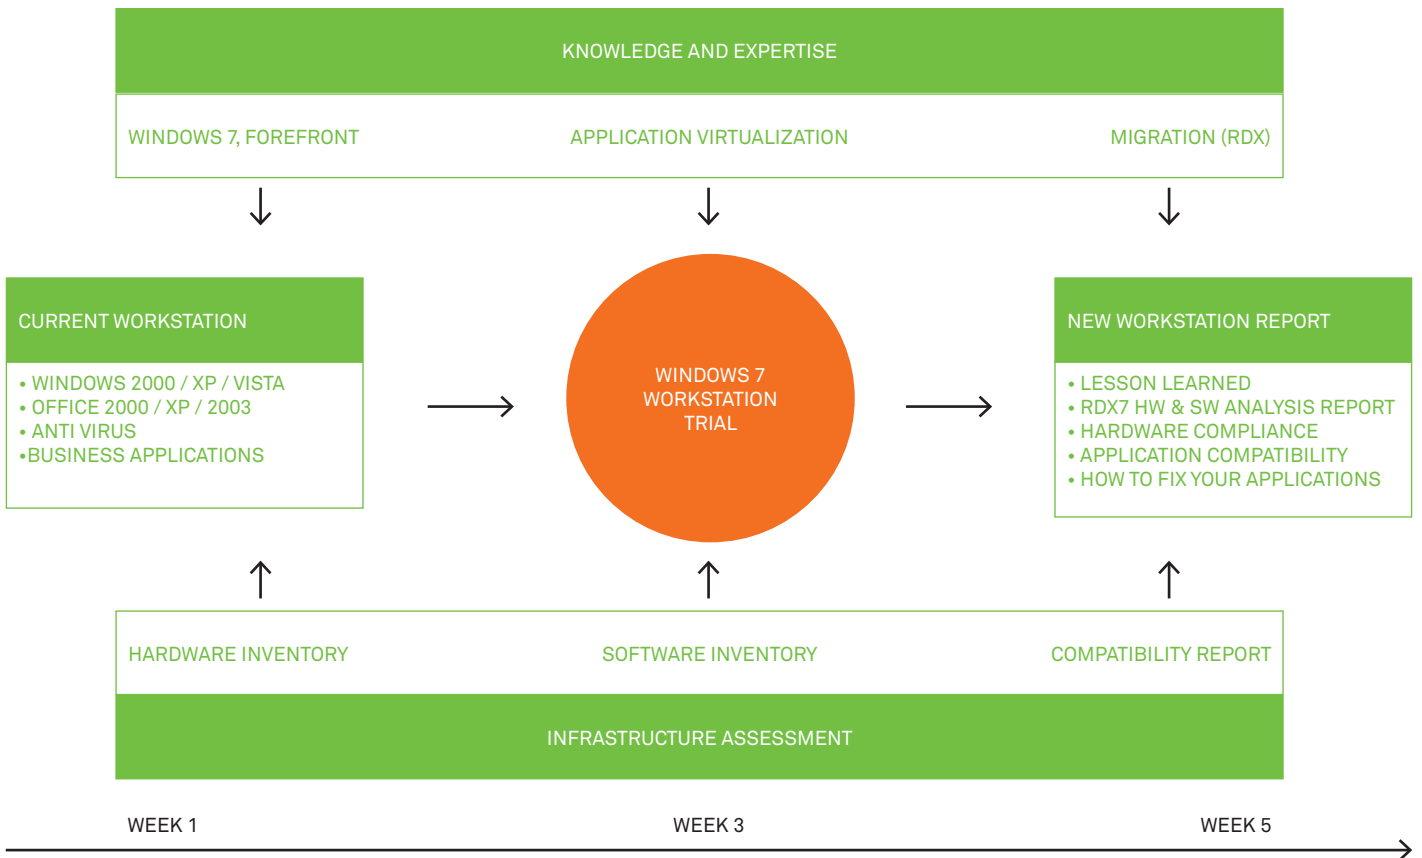

Windows 7 rollout isn't that simple. Application compatibility is an area we've seen to be tricky and migration project costs can easily get out of hand. In five weeks, Getronics' RDX7 solution combines a Windows 7 trial with a readiness scan that provides you with a companywide status of your hardware and application compatibility. That means you can get acquainted with the latest workstation technology without any risk and prepare the first steps towards Windows 7.

#### Ready, set, go!

The RDX7 solution is ready for immediate use. RDX7 is supplied as a set of pre-configured virtual machines. The technology makes the link with your own domain for production use. This means no installation is needed, and there are no changes to your own back-end. In just five weeks RDX7 is completed: a week for setting up, two weeks for packaging applications and finally two weeks to experience Windows 7 in your own environment with your own company applications.

#### Readiness scan

During the trial period RDX7 tests the extent to which your infrastructure is ready for Windows 7. Scans of your hardware and software are combined to determine the impact of any possible compatibility problems. In addition, RDX7 doesn't only track down possible blocking issues in advance, it also offers an automatic solution to fix applications.

### Migrate with the experts

Implementing new workstation technologies is tricky for most companies, because it requires up-to-date knowledge and experience. As an expert in workspace service provisioning, migrating to the latest technologies is Getronics' core business. Because of this Microsoft has acknowledged us as the best partner for deploying Windows, by nominating us as Worldwide Desktop Deployment Partner of the Year and 'top performing partner' in the Windows 7 Technology Adoption Program. Our Global deployment capabilities are supported by the Workspace Alliance and our Global Service Delivery Model.

### First step towards Windows 7

RDX7 provides an in-depth experience of the benefits Windows 7 offers. It is an ideal preparation for any plans to improve your organisations workspace. Whether for a trial or a full migration trajectory to Windows 7, RDX7 is the best first step towards Windows 7.

### About Getronics

With worldwide revenues of € 2.2 billion in 2008 and about 14,000 employees (FTE) at HY 2009, Getronics is a leading ICT service-provider in the world and the largest ICT service-provider in the Benelux. As expert in workspace management services, connectivity, datacenters, and consultancy, Getronics helps organisations and its employees to improve performance. To do this, Getronics has a complete portfolio of integrated ICT services for the large enterprise market and works according to a Global Service Delivery Model ensuring that services are provided for clients throughout the world that are of consistent quality. Since 23 October 2007, Getronics is part of KPN, the main provider of telecommunication services in The Netherlands.
